3

1. Introduction

This assignment will help you understand the concepts learnt in the session.

2. Objective

This assignment will test your skills on foundational R Programming- writing functions.

3. Prerequisites

Not applicable.

4. Associated Data Files

Not applicable.

5. Problem Statement

1. states=rownames(USArrests)

- Get states names with 'w'.
- Get states names with 'W'.

```
#1. States
=
rownames(US
Arrests)

#Get states names with 'w'.
#Get states names with 'W'.
```

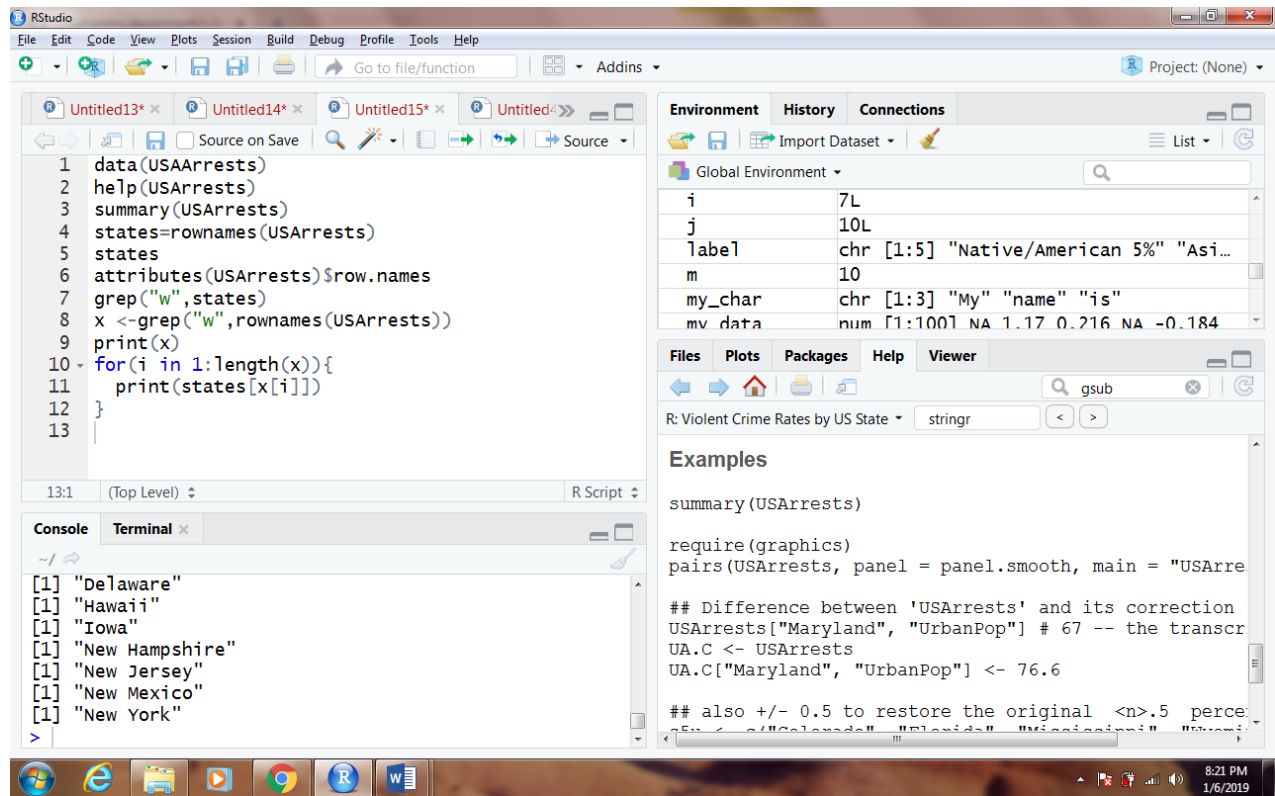

Data Analytics

```
States = rownames(USArrests)
rownames(USArrests)

#for w
grep("w",rownames(USArrests))
x<-grep("w",States)

for (i in 1:length(x)){
  print(States[x[i]])
}
```

Data Analytics

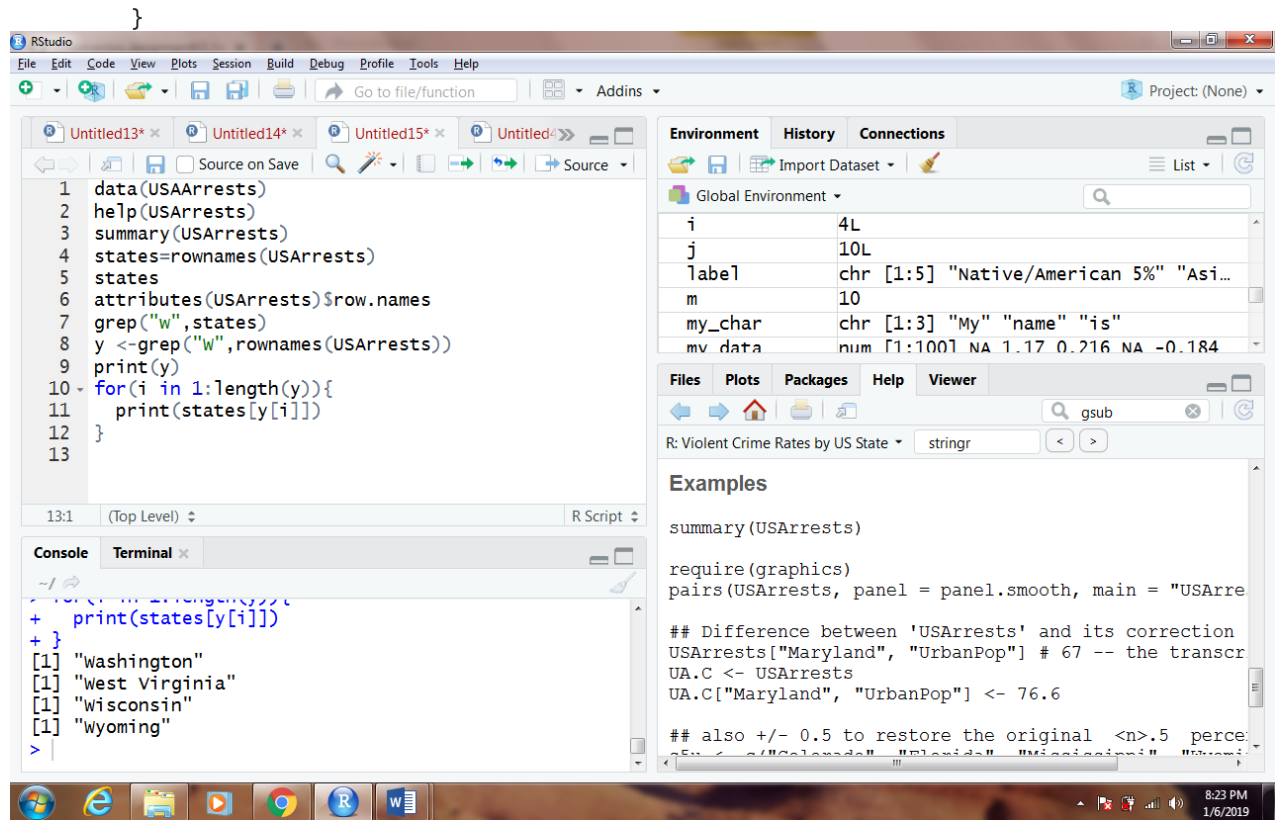

2

```
#for
W

grep("W",rownames(USArrests))
x<-grep("w",States)

for (i in 1:length(x)){
  print(States[x[i]])
}
```

Data Analytics

2. Prepare a histogram of the number of characters in each US state.

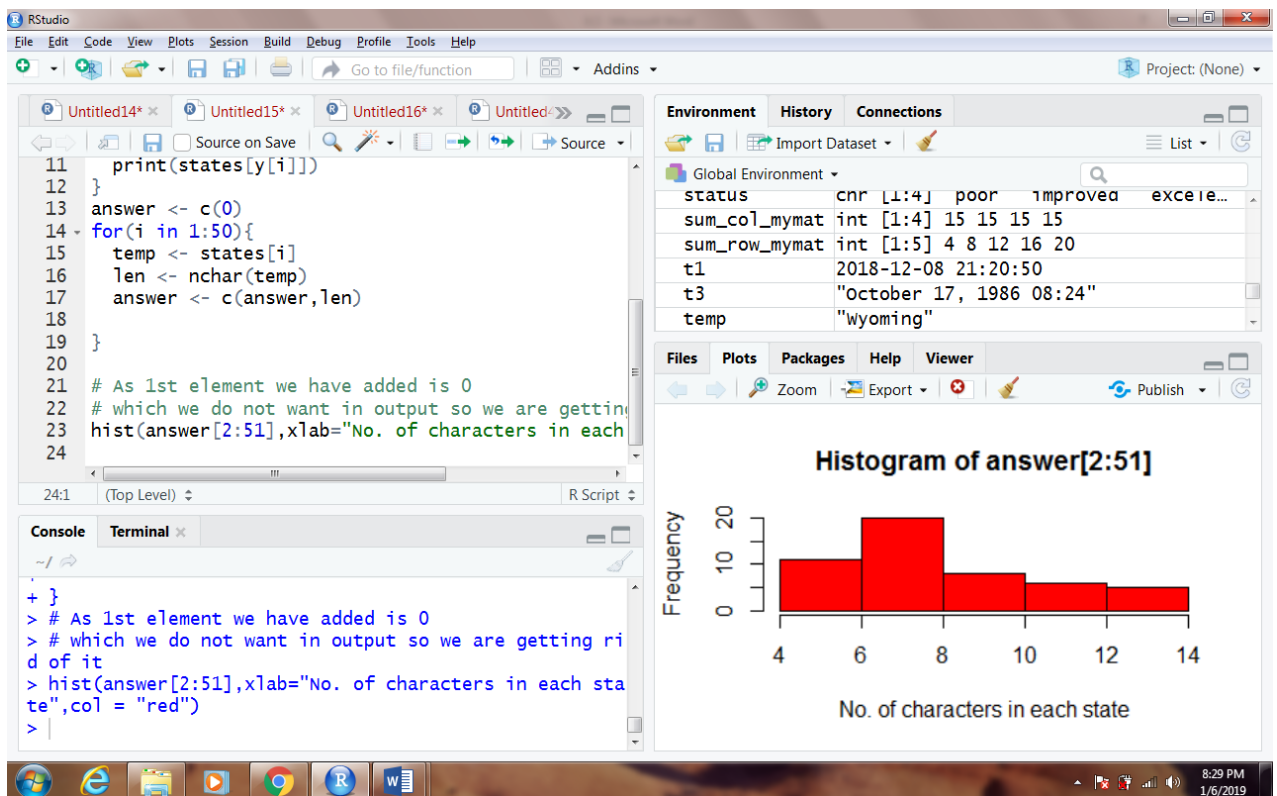

answer

```
<-
```

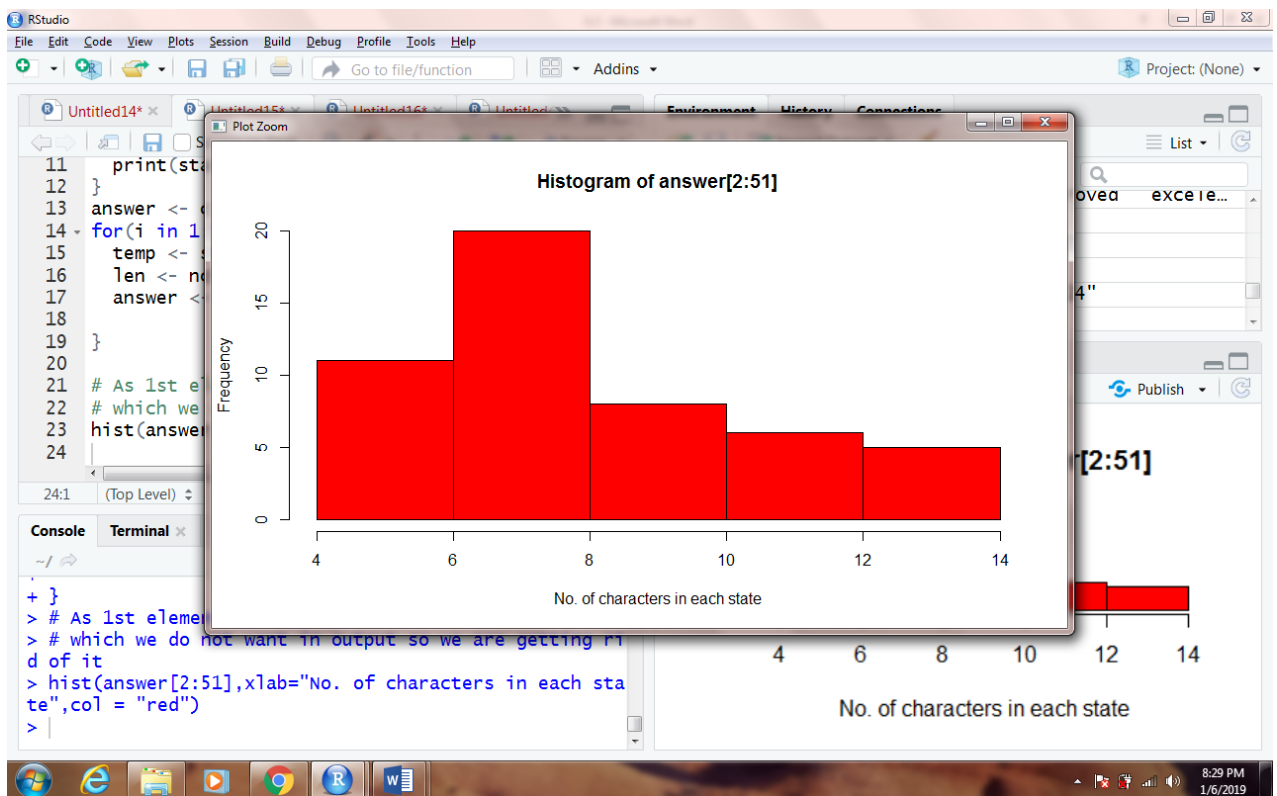

```
c(0)
```

Data Analytics

```
for(i in 1:50){  
  temp <- States[i]  
  len <- nchar(temp)  
  answer <- c(answer,len)  
  
}  
  
# As 1st element we have added is 0  
# which we do not want in output so we are getting rid of it  
  
hist(answer[2:51],xlab="No. of characters in each state",col = "red")
```

Data Analytics

6. Expected Format

1. R file should be submitted where applicable.
2. R file should be in PDF or in .r format
3. Proper screenshots of the outputs should be submitted as well
4. The r codes, if submitted in any other format, will be subjected to deduction in marks

Note: Your solution will not be entertained if it is any other format, e.g., .zip, .doc, .rtf etc.

7. Approximate Time to Complete Task

30 mins.
